

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

---

AB1  
Cant  
Claim 1 (canceled).

2. (currently amended): An information reproducing apparatus which plays back an information medium in which at least image information and control information to control a play back form of the image information are recorded, comprising:

a controller that plays back and controls the image information in a display form according to the control information, and that reports the play back control state, when the control information is detected at the time of play back of the information medium~~The information reproducing apparatus according to claim 1, wherein the control means~~controller stops the play back of the image information and reports the play back control state, when the detected control information is information to stop the playback.

3. (currently amended): An information reproducing apparatus which plays back an information medium in which at least image information and control information to control a play back form of the image information are recorded, comprising:

a controller that plays back and controls the image information in a display form according to the control information, and that reports the play back control state, when the control information is detected at the time of play back of the information medium~~The information reproducing apparatus according to claim 1, wherein the control means~~controller is

provided with ~~storing means~~ a memory for previously storing report data to report the playback control state, and ~~reports to report~~ according to the report data corresponding to the control information.

4. (currently amended): An information reproducing apparatus which plays back an information medium in which at least image information and control information to control a play back form of the image information are recorded, comprising:

a controller that plays back and controls the image information in a display form according to the control information, and that reports the play back control state, when the control information is detected at the time of play back of the information medium ~~The information reproducing apparatus according to claim 1,~~ wherein the control information has at least any one piece of information of play back stop, still image play back, and automatic play back start of the image information.

5. (currently amended): The information reproducing apparatus according to ~~claim 1~~ any one of claims 2, 3 or 4, wherein the play back control state is displayed in a display form of a superimposition display.

6. (currently amended): The information reproducing apparatus according to ~~claim 1~~ any one of claims 2, 3 or 4, wherein the ~~control means~~ controller is provided with ~~detection means for detecting~~ a detector that detects whether a car is stopped or not, and when the ~~detection~~

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appl. No. 09/549,592

*AB1*  
*level*  
~~means~~detector detects the state of on-travelling of the car, the ~~control means~~controller inhibits the play back display of the image information, and reports the play back control state.

7. (currently amended): The information reproducing apparatus according to claim 6, wherein the information reproducing apparatus is provided with ~~information medium play back means~~a reproduction device and speed ~~detection means~~detector operable to detect ~~for detecting~~ the present speed of the car, and when the ~~detection means~~detector detects the state of on-travelling of the car, the information reproducing apparatus displays and controls the information of the speed ~~detection means~~detector, and reports the play back control state.
